CONTENTS

<i>Introduction</i>	5
NATURAL FLUCTUATIONS OF ECOSYSTEMS	12
CONTEMPORARY STATE OF MARKETABLE ECOSYSTEMS	23
Marine mammals	24
Marketable fishes	30
Seabirds and colonial birds	43
CURRENT CHANGES OF THE POPULATION STRUCTURE AND SPECIES COMPOSITION	44
Quantitative outbursts of scarce species	44
Unintentional introduction of alien species	46
<i>The Black Sea</i>	46
<i>The Azov Sea</i>	48
<i>The Caspian Sea</i>	49
<i>The Baltic Sea</i>	49
<i>The Barents Sea</i>	50
Planned introduction of new species from other areas	51
MAIN CAUSES OF MARINE ECOSYSTEMS TRANSFORMATION	54
Run-off regulation and loss of spawning areas	54
Marine navigation and river-sea transportation	57
Chemical contamination of marine environment	57
Fishery mortality is the major threat	62
Introduction of new species	66
UNBALANCE IN THE BIOLOGICAL PROCESSES OF THE ECOSYSTEM OF THE SEA	68
Impoverishment of the species diversity of the sea fauna	68
Changes of the size-age structure of population	70
Breakage of the trophic links and increase of natural mortality	72
Bioenergetic unbalance	75
Breakage of the host-parasite interrelations	76
Eutrophication of estuaries and shelf shallows	77
Increase of the quantity of pelagic crustaceans	77
Decrease of the natural reproduction of the aboriginal biota	77

POSSIBLE WAYS OF STABILIZATION OF THE COMMERCIAL RESOURCES OF THE SEA	80
Improvement of fishery regulation measures	80
Shift of fishery to the non-traditional bioresources	80
Limitation of the mechanical impacts on the living benthic communities	81
Artificial rearing (restoration)	82
State support of fishery	84
Measures for preserving equilibrium in marine ecosystems	85
Expertise of the economic activity at sea.....	85
Restoration of the system of the state ecological monitoring at seas	85
Regulation of the river waters run-off	85
Biological and mechanical sanation of port areas and approach canals in the Azov Sea, North of the Caspian Sea and the Gulf of Finland	86
Sanitary and technological control and ecological standardization	87
Influence of the exotics dangerous for the aboriginal fauna	87
GENERAL CONCLUSION (ECOSYSTEMATIC PHILOSOPHY)	91
CONCLUSION	98
REFERENCE	101
MONOGRAPH AND COLLECTIONS OF PAPERS ISSUED by Murmansk Marine Biological Institute of Kola Scientific Center Russian Academy of Sciences in 1990–1998	111
